## *Introduction* ~

**Established Almost 100 Years**

N 1848, just 99 years ago this spring, Stephen Hoyt, grandfather of our present president, founded this Nursery.

From a modest beginning our business grew until we now have over 600 acres covered with specimen trees and plants of all descriptions. We have always attempted to grow trees of the finest quality, priced fairly.

We wish to thank our thousands of friends for the liberal and ever-increasing patronage which has been bestowed upon us, and we aim to offer still finer trees and better service in the years to come.

# NOTICE TO CUSTOMERS

◀ This catalog lists our trees and shrubs, but to really appreciate them you should see them. Come over to the nursery and look around. The map on the center pages shows the way.

◀ **OUR MATERIALS** and service are available to you directly or through your Landscape Architect.

◀ **PLANTING** begins in the spring as soon as frost is out of the ground and extends through April, May and June. Fall planting begins in August and extends through December, or until the ground freezes. When the season is far advanced, we reserve the right to ball and burlap (B&B) at extra charge, those items not so listed, to insure success in transplanting. The following chart is our basis for these charges:

---

## Schedule for Balling and Burlapping (B&B) Charges

Size of Plant or Tree	Charge	Size of Plant or Tree	Charge
1½ to 2 ft. high.....	\$0 50	2 to 2½-in. caliper....	\$5 00
2 to 3 ft. high.....	60	2½ to 3-in. caliper....	6 00
3 to 4 ft. high.....	75	3 to 3½-in. caliper....	7 50
4 to 5 ft. high.....	90	3½ to 4-in. caliper....	10 00
5 to 6 ft. high.....	1 50	4 to 4½-in. caliper....	15 00
6 to 8 ft. high.....	2 50	4½ to 5-in. caliper....	25 00

The above prices apply to those items in our catalog which are not priced Balled & Burlapped (B&B), when balling is necessary or requested.

---

◀ **PRICES** in this list are f.o.b. New Canaan, Conn., and are for our selection only. Specimen plants, many of which are not included in this list, when selected by you, will be charged for according to their individual value. All quotations offered are subject to prior sale. These prices supersede all others and are subject to change without notice.

◀ **DELIVERIES** — pro rated charge on scheduled trips. Special deliveries conflicting with normal schedule will be arranged and charged for at cost.

◀ **TERMS**—Cash or satisfactory references must accompany all orders, unless the person ordering is known to us.

## GUARANTEE

We guarantee to replace, at one-half original purchase price, any plant or tree that we have supplied, which dies from natural causes within a period of one year (except those items marked with a star), provided the plants have been properly cared for, and provided payment has been received in 30 days or as arranged. The cost of delivering and planting of replaced material is borne by the purchaser and replacement is made at our convenience.

Norway Maple (*Acer platanoides*)

## Ornamental and Shade Trees

Possibly the most attractive feature of many of our New England towns is the large shade and ornamental trees. It is absolutely necessary to include deciduous trees in your home and street plantings, since no others equal them in foliage and growing characteristics.

It is important to plant some of these trees each year, since it takes from ten to twenty-five years to produce a good-sized specimen. Plant medium-sized trees and they will grow rapidly into lofty specimens.

# Flowering Trees

There is probably no group of deciduous plants as popular or well known as this one. Their interesting habits of growth, with glossy foliage combined with gorgeous blossoms in the spring, and followed by attractive fruit of many colors in late summer and fall, make them an all-year-round satisfaction. Trees in this group thrive in almost all kinds of soil, and most varieties are very hardy. They flower best in full or partial sunshine.

<b>ÆSCULUS hippocastanum. <i>White Horse-Chestnut.</i></b>	Each

10 to 12 ft., heavy specimen, B&B.....	35 00
12 to 14 ft., heavy specimen, B&B.....	50 00

## Evergreens

Evergreens give permanent beauty all the year, carrying their beautiful richly colored foliage through the winter, when deciduous trees and shrubs are leafless. Every home-builder, no matter how small the grounds, needs them. They not only provide privacy, but are indispensable for shelter and wind-breaks, hedges, backgrounds, and specimens in landscape work. The slow-growing and spreading varieties such as Yews and Junipers are available for use in house and garden plantings. Practically all evergreens require light and air. Yews and Hemlocks are the most tolerant of shade.

### All Evergreens Balled & Burlapped

<b>ABIES concolor. <i>White Fir.</i></b>	Each
12 to 14 ft., specimen.....	\$50 00
14 to 16 ft., specimen.....	65 00

\*Azalea Hinodegiri guaranteed for first growing season only.

## HOYT NURSERY and How To Reach It

**O**UR NURSERY is located in the town of New Canaan, Conn., 40 miles from New York City and just  $\frac{1}{2}$  mile north of the Merritt Parkway, which connects with Hutchison River and other New York City and Westchester County parkway systems.

Approaching New Canaan from New York, turn right off the Merritt Parkway at the NEW CANAAN AVENUE, ROUTE 123 exit. Turn right on State Highway passing back under Parkway and follow Hoyt Nursery signs for  $\frac{1}{2}$  mile to Nursery.

Approaching on Merritt Parkway from Bridgeport and East, turn right off parkway at the NEW CANAAN AVENUE, ROUTE 123 exit. Proceed straight ahead and follow Nursery signs  $\frac{1}{2}$  mile to Nursery.

*Large Tree Moving is Our Specialty*

AMERICAN CEDAR, 30 feet tall; stem diameter 10 inches; diameter of ball 7 feet. This tree was planted for one of our clients in 1936 and is thriving today.

# Hardy Evergreen Shrubs

All Balled and Burlapped except where otherwise noted

The importance of this class of plant material has long been recognized by garden lovers. Since they are evergreen, they present an attractive appearance, in both summer and winter. They are comparatively slow growers, are easy to keep in bounds, and grow more beautiful with age. All of these varieties grow best in a somewhat acid soil, lightened by plenty of leaf-mold or peat-moss, and some require protected locations for best results. Certain varieties may be used with success in plantings in the shade.

# Flowering Shrubs

Included among the Flowering Shrubs are those old favorites well known to all, as well as some worthy new varieties. We offer shrubs in two grades, a regular or standard grade, and our specimen grade.

Our standard shrubs are good, sturdy, well-grown plants which will thrive and grow rapidly into fine bushes.

The specimen shrubs are larger, well-developed plants which have been spaced and pruned in the nursery, and when used in plantings, give an immediate landscape effect.

All Flowering Shrubs are bare root excepting where marked B&B (balled and burlapped)
